

ALDAT SCREAMER

The “ALDAT SCREAMER” was built by unemployed youth aged between 16 and 25 as a means of teaching them workshop skills to help them get a job in the local community. All the youth had no previous skills before attempting this build and have since gained valuable work experience and some have moved on to paid employment because of the skills they learned at the Local Drug Action Team (LDAT) Workshop.

LDAT is a Federal Government initiative, run by volunteers, to combat the use and ripple effects of Ice and alcohol and other drugs on the youth in our community.

LDAT has been operating since March 2018 and has been helping unemployed youth by training them to be more skilled and educated in the workplace and have regular visits from RED CROSS coordinators to help them to understand the effects of drugs and alcohol on their bodies and steer them towards more positive lifestyle choices.

The “ALDAT SCREAMER” is powered by an 80cc two stroke motor capable of around 50-55kph. The bike is built as a replica of a “boardtrack racer” from the 1915-20 period, and is a tribute to the brave racers of that era.

100% of all proceeds from the sale of this custom bike will go back into keeping the LDAT Workshop in Maryborough going to help our kids get a better life free of Ice and other drugs.
